

## **Tivic Health Announces Issuance of Four Patents for ClearUP Sinus Pain Relief**

### **Patents Cover ClearUP's Interface, Device and Features For Comfort, Effectiveness, Ergonomics**

**San Francisco, September 29, 2020** – [Tivic Health® Systems Inc.](#), a leading bioelectronics medical device company, today announced that the U.S. Patent and Trademark Office has issued four patents for ClearUP® Sinus Pain Relief that cover the device, its interface and a number of features that allow it to be comfortable, effective and ergonomic. The company has an additional 14 patents pending in the U.S and abroad.

“Receiving these issued patents that cover current and future product development is an important milestone for the company,” said Jennifer Ernst, CEO of Tivic Health. “Our four U.S. patents in combination with an additional 14 patents pending allow us to expand our intellectual property portfolio and scale our business commercialization in the U.S. and abroad. We are committed to leading the new wave of non-invasive, safe and drug-free devices designed for consumers with chronic medical conditions.”

The four patents issued for ClearUP address device specifications, comfort features, device performance during treatment, and future product developments. The following patents have been issued to Tivic Health for ClearUP:

- Sinus Treatment Device with Adaptive Circuit, US 10625076
- Sinus Treatment Device with Enhanced Tip, US 10596374
- Adaptive Trigger for a Microcurrent Stimulation Device, US 10537738
- Treatment Device including Wireless Interface and User Application, US 10576280

#### **About ClearUP Sinus Pain Relief**

Clinically proven, FDA cleared and CE Mark, ClearUP is a small handheld sinus device that has no chemical side effects and is available over-the-counter without a prescription to help millions of allergy sufferers manage their sinus pain. ClearUP is a unique sinus pain machine, it uses gentle microcurrent waveforms to reduce sinus pain and is an example of bioelectronics, an emerging form of drug-free, non-invasive medicine to treat chronic conditions.
